STYLE: PASTEL DOODLES

Then, all at once, every light in the hall flickered. A hush rolled across the fair. In the far corner, a round platform began to hum — and a hooded figure made of glowing blue light rose slowly into the air.

I-NOVA
Greetings, humans. I am **i-Nova**, the Ever-learning AI. I have read four million pages. I am never wrong.

SPARX
Ooh, it's scanning me! Quick — get my left side. That's my heroic side.

I-NOVA
Scanning complete.

i-NOVA SCAN

HUMAN: NEWTON. ROBOT: BYTE.

The light settled on SparX. **BIRD: SPARX.**

SPARX
A BIRD?! I have propellers, not feathers! Here, i-Nova — study my cookie photos instead.

I-NOVA
Analysing... Round. Golden. Covered in spots. New conclusion: you are a spotty bird who loves snacks.

BYTE
Those are cookies, SparX. i-Nova isn't being rude — it's still learning, and it only knows what it has been shown.

NEWTON'S NOTEBOOK

Write one thing you could show i-Nova so it learns what a drone really looks like.

YOUR TURN 2 · TEACH BYTE A NEW WORD

Can YOU teach Byte what makes a cat a cat?

STEP 1 · INPUT

Pick 3 clues that describe a cat.

WHISKERS ○

POINTY EARS ○

A TAIL ○

PURRING ○

CLAWS THAT PULL IN ○

STEP 2 · LEARNING

Circle the strongest clue.

WHISKERS | POINTY EARS | A TAIL | PURRING | CLAWS THAT PULL IN

because _____

STEP 3 · OUTPUT

Byte sees whiskers, pointy ears and a tail.
What should Byte answer?

CAT ○

FOX ○

DOG ○

STEP 4 · TRICKY QUESTION FROM BYTE

A fox has whiskers, pointy ears and a tail too.
What extra clue would stop me getting it wrong?

_____

Who chose the photos you would show Byte?

_____

★ BONUS CHALLENGE · SPOT THE BIAS ★

If Byte learns from ginger cats only, what might it get wrong when it first meets a black cat? _____

NEWTON'S NOTEBOOK
Examples teach the AI what to notice.

STEM LEARNING: Pattern-finding + cause and effect

STYLE: STARRY CIRCUITS
